

POROUS

CERAMICS

You will find some of the world's best porous ceramics in numerous shapes and sizes within this section. Soilmoisture manufactures the widest choice of air entry values and flow characteristics combined with a large selection of material types. Each porous ceramic part is produced with the utmost attention paid to detail and quality. These careful production procedures assure consistently close, uniform tolerances from purchase to purchase.

Perhaps your interests peak at incorporating a porous ceramic plate to filter or interface with a slurry or soil or finding a porous cup housing for a sensor. In any case, Soilmoisture most likely has a standard porous product to match your needs. For those with interests and needs a bit more unusual, let us provide you with a reasonable quote for a special ceramic in a size and shape that will specifically meet your needs.

- Hundreds of stock items in various formats
- A wide selection of tough rugged shapes and sizes
- Naturally wetting pores of very uniform sizes
- Standard tight tolerances or custom shapes with the precision you need
- Most can be modified by standard techniques
- Customs and Special available usually in 4 weeks.
- Glazing and machining to exacting standards.
- We'll create specialized assemblies to meet specific needs.

FEATURES

The ceramic products offered in these sections are our most popular which have been sold for decades to discriminating customers like yourself who demand the very best. Each specialty area of our ceramics product line represents the finest quality products available to you as a consumer. Many of the items are used in the fabrication of our quality field and research laboratory equipment sold under the Soilmoisture name.

The unique characteristics and quality of our porous ceramics allow them to be used in a variety of applications. The natural wetting abilities of a porous ceramic, the uniform pore sizing, and inert raw materials provide an excellent finished product for research or industrial applications. Combine these attractive features with the strength and durability capabilities of a variety of ceramic shapes and you have a limitless number of excellent possibilities.

For your convenience, at the back of this ceramics section we have provided a compendium of accessories and materials that you might find helpful in completing your project. We are constantly adding new ceramic products, and we encourage you to consult our web site at <http://www.soilmoisture.com> in the ceramic section for these new additions. If you can't find the right product to meet your special porous ceramic needs, please send us a sketch including the tolerances and quantities required for a quick bid. For those O.E.M.s looking for large commercial quantities, Soilmoisture can provide your specialty item at substantial savings.
